-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restriction

1. Restriction is required under 35 U.S.C. §§ 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 C.F.R. § 1.499, Applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1 to 6, 11, and 12, drawn to a microorganism separation device comprising a microorganism sensor; and

Group II, claims 7 to 10, drawn to a microorganism separation device comprising a pair of electrodes.

3. The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:
4. The inventions listed as Groups I and II lack unity of invention because even though the inventions of these groups require the technical feature of a sample supply means, a first flow passage, and a sensor capable of detecting a microorganism, this technical feature is not a special technical feature as it does not make a contribution over the prior art in view of Takenaka (JP 9-145593), cited in the International Search Report (ISR) mailed 10 May 2005, in the Written Opinion of the International Searching Authority (WOISA) issued 23 July 2006, in the International Preliminary Report on Patentability (IPRP) issued 24 July 2006, and in the Information Disclosure Statement (IDS) filed 14 May 2007.

5. Takenaka discloses a device comprising a solution feeding member (i.e., sample supply means) and a detector, i.e., a sensor (Takenaka at Abstract).

6. Applicant is advised that the reply to this Requirement to be complete must include (i) an election of an invention or species to be examined even though the Requirement may be traversed (37 C.F.R. § 1.143); and (ii) identification of the claims encompassing the elected invention.

7. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the Restriction Requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the Requirement will result in the loss of right to petition under 37 C.F.R. § 1.144. If claims are added after the election, Applicant must indicate which of these claims are readable on the elected invention or species.

8. Should Applicant traverse on the ground that the inventions have unity of invention (37 C.F.R. § 1.475(a)), Applicant must provide reasons in support thereof. Applicant may submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. Where such evidence or admission is provided by Applicant, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103(a) of the other invention.

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to GAUTAM PRAKASH whose telephone number is 571-270-3030. The examiner can normally be reached on Monday, Tuesday, Thursday, and Friday from 8:30 am to 7:00 pm, Eastern Time.
